

## HE DIDN'T GIVE UP

We still remember the day when we met Mr. Roshan Lal (Satyam's father) for the first time, he was hopeless, there was pain and anger in his eyes. He told us that the doctors treating Satyam earlier gave up on him, Satyam's case was then referred to the AIIMS Hospital, New Delhi. He was diagnosed with T-Lymphoblastic Leukemia (Blood cancer).

A child mean the world to his parents. Roshan Lal didn't give up, he stood up and gathered himself together. But the battle had just begin. Doctors gave an estimate for the treatment cost approximately Rs.3,00,000. Satyam's father do stitching work, through which he barely earns Rs.4000-5000 as income, how could he arrange such a huge amount and from where. Causeless Happiness Organisation took an initiative and a word of kindness was spread, people around the country came together to support a father, support a child who doesn't even know how to spell his disease. It's been 3 years today, Satyam is 11 years old, not only alive but he survive cancer. It took more than 2 years to complete the procedure but as a result of thousands of prayers and generous support of kind people Satyam survived the cancer and is under maintenance now.

However it was not easy to provide treatment to Satyam, it was the time when people didn't even know about the organisation. There were time when Satyam was severe and sometimes got panicked during treatment. He was a little child after all, but he never give up. He always believed that there are angels who are going to take care of him in every situation. It was his belief, It was prayers of thousands of supporters, it was dedication of those students that kept him going on and gave him all the strength to beared that pain.

***"It is not the effort of just one single person that counts at Causeless Happiness Organisation. It is a group effort by volunteers, donors and the causeless happiness team."***
